“I AM RESILIENT”

KIDS ACTIVITY AND COLOURING BOOK

THIS BOOK BELONGS TO

Hey Kids!

DO YOU KNOW WHAT A NATURAL DISASTER IS?

Disaster or incidents that have potential to threat lives, cause damages to buildings or cut off utilities such as water, telephones or electricity.

Wind makes kites fly. Fire can keep us warm. And rain helps flowers grow. But sometimes the wind blows too hard, fires get too big or it rains too much.

Let's learn about emergency phone numbers

NATURAL DISASTERS

FIRE

How are fires caused?

- Slow burning garbage sites, plastic and polythene wastes
- Electric short circuit
- Fire caused by cooking

**Draw and color any two causes of your choice of fire
Incidents**

“Matches and lighters are tools, not toys. These tools help adults use fire properly. If you see someone playing with fire, tell an adult right away.”

NEVER PLAY WITH MATCHES

“If a fire starts in your home or you hear the smoke detector alarm, yell ‘Fire!’ several times and go outside right away.

If you live in a building with elevators, use the stairs. Never try to hide from fire. Leave all your things where they are. Once you are outside, go to your meeting place and then send one person for help.”

“If your clothes catch fire...stop, drop and roll. Stop what you are doing, drop to the ground, cover your face and roll over and over until the flames go out.

Running will only make the fire worse.”

FLOODS

If you see flood waters, move away from them. Go to a higher place. Never play near or try to swim in flood waters

THUNDERSTORMS

If you see storm clouds or hear thunder, go inside right away.

TSUNAMI

When you see sudden rise or fall of the water, move away and run to a higher place.

Types of natural hazards
